Background

In my main role I lead the web frontend engineering team at XING.com, owning the full frontend layer of a high-scale application serving 300+ server-side rendered requests per second. Freelance projects benefit directly from this: architectural thinking, production mindset, and real hands-on implementation — zero handoff friction.

Expertise & Skills

CORE STACK

TypeScript · React · Next.js · Remix · Solid.js / SolidStart

STYLING, UX, CONTENT

Tailwind · Advanced CSS · Styled Components · A11y · SEO
